

The blue lines on the photo are an approximation of the area EdAdvance is interested in purchasing.

EdAdvance is only interested in the parcel of land that would include the current buildings (#1-3 on map), all driveways and parking structures, and the developed land surround those structures.

In addition, the purchase must include a small section of land on the opposite side of University Dr (#4 on map) where the septic system is located. The required size/proportion of that area would need to be determined, but we are only interested in as much as would be reasonable to maintain the septic systems on the property into the future.
