Subject: RFP #FWD-038-021921

Dear Pennie,

Thank you for the opportunity to participate in your RFP event for The City of Torrington 2021 Fireworks display. Attached are your required forms as well as a Zambelli proposal for the July 9, 2021 display (rain date July 10<sup>th</sup>).

We are in acceptance with the general details and requirements of your proposal. Please note that while we are in total compliance with the guidelines established by NFPA 1123 Code, we exceed the requirement which specifies the safety fallout distances of a display. NFPA requires that there is 70 feet for every one inch in the diameter of the largest aerial shell being used. Zambelli Fireworks adheres to the display area being equal to 100 foot per inch.

The cost for this display proposal is identified in two locations. On page 8, Schedule of Services and on page 12, the product synopsis page. For the same exact display and technician crew provided in years past, the cost is \$15,500.

ALSO, attached is a SAMPLE of our contract addendum related to COVID cancellations/postponements.

Thank you once again for providing the opportunity to participate in your RFP. I look forward to a response as to the results of your proposal review.

Sincerely,

- We are the most recognized brand in the industry and our buying power assures that you will receive a dynamic assortment of the highest quality product within your budget.

## Presentation Segments

- **Opening:** An opening barrage is designed to engage the audience and get their attention focused on the display. The opening barrage will certainly impress as multiple shots of comet tails, aerial shells and salutes light up the sky. As the opening grows, the intensity of colors and sound will fill the sky with effects.
- **Feature Segment:** The main body of the fireworks display is about rhythm, timing and choreographing effects and music thematically throughout the show. Some fireworks shells are designed to have loud bursts and extreme intensity, while others are designed to have long duration and intricate pattern effects. The design team hand-selects every display shell, sound and effect used to enchant spectators. No two Zambelli displays are the same, and there are no duplicates of tableaux throughout the program.
- **Grand Finale:** Human nature is to remember things last experienced. The Grand Finale is what people will remember most about a fireworks production. Zambelli has a long tradition of supplying the biggest and the best finales in the industry. It will be loud - it will be intense - it will be long - and it will absolutely leave a lasting impression. Hundreds of multi-colored shells, crackling and bursting silver and gold glitz and glitter, and of course chest-pounding titanium salutes will blow minds.

## Program Philosophy

Just as a movie has various segments that flow together, fireworks are a similar production that should never, *ever* leave the audience disappointed. Typically, there is an opening, main body and grand finale segment in a fireworks display.

Zambelli Fireworks adheres to fundamental principals in creating the finest displays in the industry:

- **No Dead Air:** Just like any production, dead air is simply not acceptable. At any given time, there will be multiple firings of effects into the night sky.
- **Production Combination:** One of the keys to designing a great show is to use a large variety of pyrotechnic devices. Using a wide array of effects is the only way to keep the audience entertained. Different sounds, colors, and effects will be chosen carefully to maximize intensity and fill the sky above.
- **Rhythm and Intensity:** Just as any fabulous show, fireworks have flow and intensity. A show too fast or too slow can get monotonous. Zambelli designs the shows leading with a barrage of colors and effects, followed by moments that are sophisticated and elegant.
- **Finales:** *This is truly an art!* It's not just about shooting a lot of shells. While true from a quantitative standpoint, a finale must make sense to entertain most effectively. Zambelli designs finales that start slow and build in intensity until the sky erupts into a symphony of color, effects and noise.
