RE: 3828 Tarringford St., Torrington, Ct.

Mr. Dismukes,

The TAHD is in receipt of the proposed sewer line extension scheduled to take place in the area of 3828 Tarringford St. in Torrington. The property in question has a history of sewage issues dating back to the late 1980's. Based on your observations, the system is failing once again. Connecticut public health code 19-13-B103 compels sewage to be disposed of in a code compliant manner, either through the preferred method of connection to a municipal sewage collection system or via a code complaint subsurface sewage disposal system (SSDS). Based on limited information on the property, it would appear that a code compliant SSDS may be difficult or impossible to achieve.

The TAHD supports the voluntary connection of 3828 Tarringford Street to the municipal sewer system to relieve the existing violation of section 19-13-B103. Failure to properly dispose of domestic sewage will result in a legal order from this office to do so.

If you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Thomas R. S.", is written over the word "Sincerely,".

Thomas Stansfield MPH R.S.
